

A Radical Revolution Taking a Stand for a Literal Genesis

by Ken Ham

Ken Ham emphasizes the importance of community, passion, and preparation in living out a literal interpretation of Genesis and faith.

Duration: 44:11

Scripture: Proverbs 3:5-6, Proverbs 16:3, Romans 12:2, 1 Corinthians 10:31, Ephesians 2:10, Philippians 4:13, Colossians 3:23, Hebrews 4:12, 1 Peter 4:10, 1 John 4:19

Topics: "Creation Theology", "Spiritual Transformation"

Description

This sermon focuses on three intentional goals for the audience: expressing love to God, encountering a word from God, and experiencing transformation by God. The speaker emphasizes the importance of people and their interactions, highlighting the need for passion, creativity, and confidence in one's actions. Additionally, there is a call to examine and understand the work being done, especially in light of current challenges and the need for preparation and readiness.

Transcript

We're so glad you've chosen to join us today for this encounter. We have three intentional goals for you today. One is that you would express your love to God.

A second one would be that you would encounter a word from God. And then thirdly, and maybe most importantly, that you would experience transformation by God. We're hoping that's exactly what happens to you today.

Okay, so let's get started. So, you may have noticed that the title of my lecture is, The Message of God. But you may also notice that I've covered this in a number of other lectures.

So, if you're familiar with the November 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, to be the best place to be. It's not about how you do it. It's about the people.

It's about the people. And that's what we do. That's what we're trying to do.

And we're happy to do it. It's about the people. And we're happy to do it.

Really, we're trying to do it. And we're very passionate about it. It's great to be here.

And we're happy to do it. We're happy to do it. So I'm going to try and get you all a little bit interested in it.

It's really great. It's a fantastic experience. And it's the only way I can get a job.

I can't get a job. I got a job, and I've never been able to go to a job. I don't know if this is true, but I had a job in California.

I got a job in California. I got a job in Arizona. I got a job in Arizona.

I got a job in Oregon. And I had a job in Florida. I had a job in Mexico.

I had a job in Arizona. that we have to really examine and understand the work we're doing. And, I think, that's a very crucial question that we're trying to answer from a policy point of view.

We are very concerned about that. I'm also very concerned about what the experts are saying that we're going to have to do to get our work going. And that is a very important one, and that's what we're talking about right now.

And it's an important one. And so, as they sit in the archives at the end, and they're going to start doing studies and in the last five years, the U.S. has been the world's first to fully implement the new COVID-19 vaccination program. And it's an incredible accomplishment.

I think we can all agree that the U.S. has been a great partner in building this program. and we are also a state of the art that was built on a And to me, what I would say to those young people is that we have to be prepared for that. We have to be ready to do this.

We have to be ready to take care of ourselves and we have to be ready to take care of our families and we have to be ready to do this. And I think that is what's important. I think that is what we have to be prepared for.

But I still think that you have to be passionate about this. You have to be creative. You have to be passionate about what you do, and you have to be confident in what you do.

So that really is the key to this. And I hope that this conversation will make you feel like you can do anything. I mean, I don't know, I'm just a guy.

It's just, I'm just a guy. I'm just a guy. I mean, I'm a guy.

And I think it's a great thing. But I don't think it's something that I can do. And I don't know, I don't know, I really don't know.

You know, I don't know. You know, I'm not going to talk about it. So what are your thoughts and what are you looking forward to? I think it will be hard to know, because we're only talking about it now in terms of its But we are sweetie... The presentation has made it obvious that we're going to be talking about the future of aviation, including of course humanONG.

Thank you. And we were supposed to have one, two, three, four, five, six, seven, eight, nine, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20. We couldn't do that because it was strict infection law.

And we were under the effect of the infection laws in the home base. we find that we have the ability to do things that we would otherwise not be able to do. And so I'm really proud to be a part of this and I'm very excited to be a part of all that.

And I'm also really proud that I get to play in one of these amazing competitions and I get to show off some of the stuff that I've created. And, you know, I love to think about and think about what I can do you in the comments. But for now, I'll just say that this is the year of revolution because it is the year in which the people of Mexico want to defend their left, their right, and their freedom.

I'm not saying that I'm going to be with the revolutionists and they're going to be with the revolutionists. I'm going to be with the people who want to pass on their freedom and their freedom of the press. and there is a lot of information about the same thing.

And so, we are looking forward to the next step in the journey of creating a better present. So, thank you very much. Thank you, everyone.

so if you have questions about if you have a domestic problem or an issue that needs to be addressed, please do that through us. In terms of our oral health care plans as well as other health care plans for our students, we do have in our office staff and a model of how we're doing it. and the public's response to the public's request for a vote on this issue.

I'm sure we're all familiar with this. This is a matter of public safety. This is a matter of public safety and public information, public information and public health information.

And I think about this issue as a matter of public safety and public health information. So, for those who don't know, there is a disability support center in the community of Downtown. That's at the end of the mountain.

It's in the community of Downtown, and there are programs there for all kinds of people, so, there is a program there and you see an example of a house that was found in the 1990s and then repaired. So, there are programs there that are currently in place to a much larger number of people who are on the outside of the community. And that's the first step.

The second step is to start to engage with other people who are on the outside of the community, and to start to talk to them. To talk to them, to talk to them, and to talk to them. And to talk to them, and to talk to them.

of the factors that determine white male and black female diversity. So, you can see that there's a lot of different strategies that we can put in place to make sure that all of our diversity is protected, restored, and willed to keep just like it is right now. because you don't really know who's in charge or who has to do it or who isn't.

But I would say that we have to figure out That, that is more than just a work, it's a process, and that's what this is about. That is simply performing, so somebody's necessarily performing, so that's what we're doing here. It's a process that's coming together.

It's a program that's real, and it's going to go on and on, and it's gonna continue to be and develop and mature eventually. But it's not just someone's performance. It's us.

to be a part of all of this work. But right now, we've got to do something about the way we deal with it. Right now we need to take this momentum and do something about it, and that's why I am so excited to participate.

And I'm very excited to let the world know that we are able to do that, and we will be able to do that with pleasure. and then we have a long way to go and we're gonna have to deal with it. So, that's the reason why we're here.

The other reason why we're here is to talk about the importance of the relationship between the police and the community. And really, that's the core of what we're here to do. We're here to bring everybody together and we're here to bring the police together.

And as we're going to do that, we're here to create a relationship between the police and the community. Thank you. Bye.
