The famous philosopher Pascal once said, "It's illogical to not believe in miracles." Miracles look illogical. But I have to say in the light of experience that in reality the realm of miracles extends beyond the limits of logic. A lot of miracles happen in our daily life with or without our knowledge. Sometimes we feel like we can't take a single step forward. If we think logically, we can't take a step further. The border of logic ends there. That is where we expect a miracle. A miracle, which can't be measured by logic and is beyond human intelligence, happens there. This reminds us that beyond the visible world there is an invisible truth.

An important door to a spiritual and invisible world opens here. depression-94808_640 You might be stuck with a lot of problems in your life.
