## Transcript

I have it here. I'm going to use this rotten wood right to build the structure. You go there and you say, well, this is just not acceptable wallet.

Let's get all get covered up. The plywood is going to hold it. Who cares? No, but if you actually concerned about building something solid building, something precious building, something good.

You'll take a hammer and you'll go smash out every rotten two by four that's there and say redo it because if natural things are important to us, how much more spiritual things you say? Well, you know, it's not a big deal. If I believe that Jesus is is a Jesus with a small J like the Jehovah Witnesses believe it. You know that in the beginning was the word and the word was with God and the word was a God do you believe in that Jesus do you may as well quit building? You may as well shut it down because at the end of your life, you're going to find out that you had a Jesus that couldn't save you.
